

## **Dexterra Group Commits to Canada's Net Zero Challenge**

I am pleased to share that Dexterra Group has enrolled in Canada's **Net Zero Challenge**. This voluntary federal program asks companies to develop and implement credible plans to transition their operations and facilities to net-zero emissions by 2050.

As one of Canada's leading support services providers, we are on the forefront of helping our clients achieve their energy efficiency and carbon reduction goals. Every day, our teams deliver solutions that improve performance, reduce environmental impact, and create smarter, more sustainable operations.

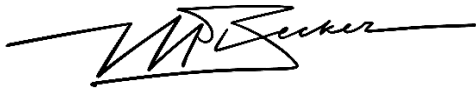

Through the Net Zero Challenge, we are committing to:

- Achieve net-zero emissions across Scope 1 and Scope 2
- Include the most relevant Scope 3 category in our planning
- Report on our progress annually
- Review and update our net-zero plan at least every five years

By joining the Net Zero Challenge, we reinforce our role as a trusted services partner to the Government of Canada and our private and public-sector clients working to accelerate progress towards a low-carbon future.

For more information on the Net-Zero Challenge, please
